

Free DWG CAD software

CADDIT, in partnership with progeSOFT, announced the Australian release of progeCAD Smart

progeCAD is widely regarded as a CAD system of highest quality and compatibility with the AutoCAD product line. This new release makes personal AutoCAD compatibility available to everybody... completely FREE. ProgeCAD 2008 Smart! is available for download at the website. This is the long-awaited free successor to progeCAD LT 2006.

Smart! is fully functional and powerful DWG based CAD software that is absolutely free for personal use only.

There are no rivals on the world free CAD scene in terms of AutoCAD compatibility and functionality.

Smart! derives it's features directly from the professional codebase of progeCAD.

The software is easy to learn and simple to install.

Some significant features of progeCAD include: .

- AutoCAD 2007/2008 DWG files completely compatible.
- Express tools availability.
- PDF format printing.
- Photorealistic Rendering.
- True Colour Support.
- eTransmit.
- Asiatic fonts support.
- ALE blocks management module with more than 10,000 blocks (separate download).
- incredible enhancement of the services performances.

Only some of these excellent features are included in Smart! The software may be freely downloaded by anyone.

It may be made available on websites and reviewed on the Media without any limitation.

Commercial or business use of any kind, however, is prohibited.

No commercial license is granted for Smart! Ethical Business - Like its predecessor progeCAD LT 2006 the software is related to a charitable initiative in favour of Doctors Without Borders for the Darfur, a western Sudan region in Africa, that endures a humanitarian crisis without precedents.

All of the users that want to help us in the initiative can carry out some donations.

Donations do not limit in any way the free usage of the software.

CADDIT Pty is legally based in Sydney, Australia and provides a wide range of design solutions, ranging from consulting to design contracting, software development and sales.

They can be contacted via their online website at <http://www.caddit.net>.

ProgeSOFT SAS Como, Italy has been specializing in CAD for the last 18 years and is an executive member of the IntelliCAD Technology Consortium.
